

Lane Restrictions

Main Street Bridge over St. Vrain Creek

Project Overview

Focus on South Main is a multi-year effort intended to improve the southeastern gateway to Longmont's core along Main Street. There are three components that comprise the *Focus on South Main* effort: Main Street and Ken Pratt Boulevard Intersection Improvements; Main Street Bridge Replacement at St. Vrain Creek; and Main Street Pavement Reconstruction.

- Work has begun on the Main Street Bridge Replacement project. Tree removal along St. Vrain Creek is expected to be completed by November 16, 2015. The work currently being performed has been limited to the creek. Removal of abandoned sanitary sewer, manholes and riprap along the creek has been completed.
- Closure of the right, southbound lane on South Main Street will continue as crews prepare to begin re-locating utilities that are currently attached to the bridge. The relocation of utilities is expected to begin approximately November 23, 2015 and will continue for approximately two weeks.
- Access to South Main Street from Delaware Avenue will be closed during the utility relocation. The access closure will be in place from approximately November 23rd to December 7, 2015. During this time access to Delaware Avenue can be made from South Pratt Parkway.
- Please keep in mind that dates for scheduling are approximate and may need to be revised due to weather or other conditions that may arise during construction.

The City of Longmont and Zak Dirt are working together to minimize the impact on area businesses and the traveling public during this project. Thank you for your patience during this important work.
